

Dr. Riya Rawal

AI Researcher | Future Products | AI Leadership

Advancing applied AI with scientific depth

Dr. Riya Rawal is joining AI7Lab to strengthen the research foundations behind its future products and to lead the lab's artificial intelligence efforts. Her mandate connects rigorous inquiry with practical product development - helping the team turn emerging AI capabilities into useful, trustworthy and scalable experiences.

A research-led voice at the centre of AI7Lab's next chapter - shaping the questions, methods and product choices that move ambitious ideas toward real-world value.

Why her appointment matters

Research discipline Brings a scientist's approach to problem framing, experimentation, evaluation and evidence-based decisions.	Product translation Helps convert advances in AI into product concepts, prototypes and capabilities grounded in genuine user value.	Responsible ambition Supports AI7Lab in pursuing frontier opportunities with careful validation, human oversight and attention to real-world impact.

ROLE AT AI7LAB

Building the research engine for future products

At AI7Lab, Dr. Rawal will support the development of future products while providing direction for the organisation's broader AI agenda. Her work will help establish a repeatable bridge between research insight, technical experimentation and product execution.

- 01

Set research direction

Identify high-value research questions, emerging technical opportunities and areas where AI7Lab can build meaningful differentiation.
- 02

Guide experimentation

Define hypotheses, evaluation methods and learning loops that allow teams to test ideas quickly without sacrificing scientific rigour.
- 03

Shape product intelligence

Partner with product and engineering teams to determine where AI can improve capability, usability, quality and scale.
- 04

Strengthen responsible AI

Encourage transparent evaluation, human-centred design and appropriate safeguards throughout the product lifecycle.
- 05

Build research culture

Champion intellectual curiosity, documentation and knowledge sharing across AI7Lab's multidisciplinary teams.

Academic distinction & representation

A gold medallist in Computer Science at both undergraduate and postgraduate level, Dr. Rawal brings a record of sustained academic excellence to AI7Lab. As a woman building a career in a field where women remain underrepresented, her leadership also broadens the perspectives represented in advanced technology research and product design.

Her appointment reflects AI7Lab's belief that the strongest AI products emerge when deep technical thinking, diverse perspectives and an uncompromising focus on practical outcomes come together.
