

Human-versus-AI Decision Matrix

Instructions: score each dimension from 0 (not started) to 5 (operational). Record the owner, target date, evidence, red flags, and the next action. Use the completed assessment in an AI7Lab readiness workshop.

Dimension	Score	Owner / target	Evidence and next action
Consequence	0-5		
Reversibility	0-5		
Uncertainty	0-5		
Accountability	0-5		
Transaction value	0-5		
Legal effect	0-5		
Exception frequency	0-5		

Scoring: 0-20% Initial; 21-40% Emerging; 41-60% Defined; 61-80% Operational; 81-100% Optimized.

Red flags: no accountable owner, no representative evidence, unclear decision authority, untested failure paths, or no rollback and incident process.
